

## Isilon Probe for UIM

### Product Datasheet

Superna © 2018

Superna Monitoring Solutions - enables CA UIM to receive native Isilon alarm data and DR status from Eyeglass

As organizations depend on Scale Out NAS solution with EMC's Isilon product for business critical applications distributed over geographic locations, monitoring DR status and readiness becomes a challenge without good tools.

### Key Features

1. Superna Eyeglass® Isilon probe integrates with CA UIM as a native probe and extends Eyeglass multicluster DR monitoring and reporting into CA Technologies Unified Infrastructure Manager
2. Simplified monitoring for Scale Out NAS with EMC Isilon
3. Monitor 1-20 Isilon clusters with a single appliance
4. Cluster Events mapped to UIM alarms with cluster and node information
5. Superna Eyeglass® DR status provides cluster replication status
6. Isilon Events sent to UIM as alarms

7. SyncIQ RPO violations sent to UIM as an alarm
8. Custom alarm fields Converged deployment with Superna Eyeglass®, UIM robot and probe deployments on single appliance
9. Build multi device DR dashboards in UIM with DR status of distributed storage at production and DR sites Automated Failover alarms
